1 Division of two numbers

```
#include <stdio.h>

int main()
int a = 20;
int b = 4;
int result;
result = a / b;

printf("Division = %d", result);

return 0;
```

2 Output

A screenshot of a Windows terminal window with a dark background. The terminal shows a PowerShell prompt at the path C:\Users\admin\AppData\Local\Temp. The user has run a command to compile a C file named tempCodeRunnerFile.c into an executable named tempCodeRunnerFile, and then executed it. The output of the program is "Division = 5". The terminal window has standard Windows taskbar icons at the top and a chat sidebar on the left.
