

Computer programing assignment

Ayan Polra

21 August 2025

1 KG to Grams

```
#include <stdio.h>

int main()
float kilograms, grams;

    printf("Enter weight in Kilograms: ");

    scanf("%f", &kilograms);

grams = kilograms * 1000;

    printf("Weight in Grams = %.2f\n", grams);

return 0;
```

2 Output

```
PS C:\Users\admin> cd "C:\Users\admin\AppData\Local\Temp\"
; if ($?) { gcc tempCodeRunnerFile.c -o tempCodeRunnerFile }
; if ($?) { .\tempCodeRunnerFile }
Enter weight in Kilograms: 12
Weight in Grams = 12000.00
PS C:\Users\admin\AppData\Local\Temp>
```
