1 Net salary deduction

```
#include <stdio.h>
```

int main()

```
float basic_salary, allowance, deduction, net_salary;
```
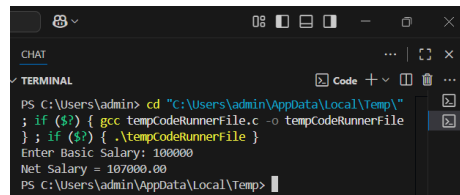

```
printf("Enter Basic Salary: ");
```

```
scanf("%f", &basic_salary);
```

allowance = 0.10 * basicsalary;
deduction = 0.03 * basicsalary;
netsalary = basicsalary + allowance - deduction;

```
printf("Net Salary = %.2f\n", net_salary);
```

return 0;

2 Output
